

REMARKS - General

Based on the Notice of Non-Compliant Amendment (37 CFR 1.121) mailed on August 17, 2007. Applicant has used the correct status identifier of "Canceled" for the claims 16-28.

By the above amendment, Applicant has currently amended all of the claims to define the present invention more particularly and distinctly so as to overcome the technical election/restrictions and/or objections and rejections and define the present invention patentably over the prior art references.

Applicant respectfully submits that the amended claims are new in a proper form and the amended claims all define patentable over the prior-art references and meet Examiner's requirements on election/restrictions. Therefore, applicant submits that this application is now in a full condition for allowance, which action applicant respectfully solicits.

Applicant has amended the drawing, specification, abstract, and rewritten the amended claims of this application so that they are proper, definite, and define novel physical feature structures, which are also unobvious. Patentable subject matter is clearly present in the patent application. For any reason, if this application is not believed to be in the full condition for allowance, Applicant respectfully requests the constructive assistance and suggestions of Examiner pursuant to M.P.E.P. Section 2173.02 and Section 707.07(j) in order that the undersigned can place this application in allowable condition as soon as possible and without the need for further proceedings.

Very respectfully,

A handwritten signature in black ink, appearing to read "George J. Miao", with a horizontal line drawn underneath it.

George J. Miao
